ABOUT

Hi! I'm Lucio Fuentes, a passionate Full Stack JavaScript developer with a firm belief in the power of technology to transform the world. With a solid background and extensive experience in web development, I pride myself on being a creative problem solver and a lover of clean code.

EXPERIENCE

 01/08/2023 - Actuality

Migration of the whole application to NextJS version 13, following Material Desing documentation for the user to have a better experience on the site.

Applying best practices in the code in order to maintain a stable and understandable workflow.

We also use i18n to internalize the site, currently has two languages which are English and Spanish.

PROJECTS

Final project - Henry Gym

The final project of henry's course in which we created a web application where one could subscribe to a real gym, the application had a catalog of routines that could be performed in the gym or at home. It also had classes of different activities that were in person at the gym.

- In the front end we use ReactJS as the main framework along with Redux to handle the different actions on the page. On the front end we use a mix of MaterialUI and Css modules. We use Auth0 for the creation of accounts on our site along with Socket.io for email notifications and Stripe to generate the payment gateway for our site.
- Back-End : In the back-end we use NodeJS and Express for the creation of our server and routing. As databases we use MySQL and its ORM Sequelize to manage the tables created.
- We use Cloudinary for the image upload when creating our own routines.

Airbnb Clon

Personal project I did to polish my knowledge about typescript and nextJs. Learning prima and using mongo atlas for my database.
